01

myself

hey, I'm myles

I'm a rising junior at UC Berkeley, I love front-end development and UI design, and it's been a great experience at fivestars

mylesdomingo@berkeley.edu

what i've worked on

02

really cool things

this summer, I've worked on the instore team, creating software for front-end and middleware technologies for cPay and mPay tablets using ReactJS.

I've resolved various bug fixes and created new user flows -- writing tests to ensure stability going into production.

 [MPAY-5] Alerts: Card reader not connected  in progress

Hey can you check out
my new project?
<https://localhost:300>

i dont think thats valid

What do you mean? It
works for me

its "localhost" for a
reason

Did you see it yet?

def no.

You probably have a
virus

can someone who knows javascript
help me please i'm desperate

~ programming ~

I learned React, a powerful library for front-end development in my first two weeks here -- that's I got paid to learn a highly sought out skill that other people *pay classes for*.

aside from programming and testing code,, I've learned plenty of soft skills -- eg. communication, asking questions, scoping difficulty, working a team environment, etc.

im done am i

03

what i've learned

what was challenging

honestly everything lol

diving straight into my first internship without any work experience, a rough onboarding with little documentation, and only a vague understanding of code and what's going on

mylestomingo@berkeley.edu

Myles Domingo 3:11 PM

wait i did find this weird error

Myles Domingo 4:19 PM

can someone help me

August 2019

Hope Yu

Myles Domingo 2:59 PM

quick question: how do i test for coverage on branching CONFIG.env?

Hope Yu

Myles Domingo 10:41 AM

quick question -- if i'm currently failing tests on instore validating cpay/mpay for snapshots -- do i need to run snapshot tests with the instore branch on cpay/mp

Hope Yu

Myles Domingo 10:24 AM

quick question -- if i need to make changes to instore (added some dine is it a separate process?

quick question:

myledomingo@berkeley.edu

August 2019

05

what i enjoyed

5/5 stars

I think it's really cool that I'm working on real, live projects -- being integrated into sprints, creating meaningful applications.

That, and the cooperation from everyone on the team has helped my learning and growth as a software engineer.
